EDUCATION

Vellore Institute of Technology

August 2023 – July 2027

Bachelors of Technology (B. Tech) in Computer Science & Business Systems (CSBS)

- CGPA: 8.65

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, Bash, HTML, CSS, SQL

Frameworks & Libraries: FastAPI, React, Streamlit, Firebase, TensorFlow, Paramiko

Systems & Tools: Linux (CentOS/RHEL), Git, SSH, VMware, Docker, REST APIs, PBS/TORQUE

Core Areas: Backend Development, Systems Programming, High Performance Computing (HPC), Machine Learning

WORK EXPERIENCE

Defence Research and Development Laboratory (DRDL), DRDO

May 2026 – June 2026

Software Development Intern

Hyderabad, India

- Engineered a secure web-based platform for remote HPC job execution and monitoring on Linux environments over SSH.
- Designed a modular client-server architecture supporting PBS/TORQUE-compatible scheduling with automatic fallback to standalone execution.
- Implemented live job monitoring, execution history, remote log retrieval, and intelligent error diagnostics
- Refactored the application into scalable frontend and backend modules, improving maintainability and extensibility
- Developed and validated the system in Docker and VMware-hosted CentOS environments following secure practices.

Tata Advanced Systems Limited (TASL)

May 2024 – June 2024

Software Testing Intern

Noida, India

- Performed functional and diagnostic testing of radar subsystems in Linux-based command-line environments.
- Executed hardware validation, LAN connectivity, serial communication, and system verification using Linux utilities
- Worked with radar quality assurance workflows involving Random Vibration and Thermal Cycling Stress Screening.
- Gained practical exposure to radar signal processing concepts including CFAR, MTI, STC, and system-level debugging

PROJECTS

Remote HPC Job Execution & Monitoring System 🔗 | Python | Streamlit | Paramiko | Linux | SSH

- Developed a secure client-server platform for remote execution, monitoring, and management of computational jobs on Linux servers.
- Implemented PBS/TORQUE-compatible scheduling with automatic scheduler detection and standalone execution help.
- Built real-time job tracking, remote log streaming, multi-user isolation, and intelligent execution diagnostics.
- Designed lightweight PBS simulation utilities for validating scheduler workflows in non-HPC environments.

RagaLens 🔗 | TensorFlow | FastAPI | React | Librosa

- Built an AI-powered Carnatic raga recognition platform capable of classifying 96 ragas using deep learning.
- Engineered an audio feature extraction pipeline using MFCC, chroma, and spectral descriptors.
- Developed DNN and CNN models with weighted ensemble inference achieving nearly 70% validation accuracy.
- Designed REST APIs and real-time inference pipeline supporting both uploaded audio and microphone streaming.

Campus Homie 🔗 | React | Firebase

- Developed a community platform enabling students and faculty to request, discover, and provide campus assistance.
- Built a responsive React frontend integrated with Firebase for real-time data management.
- Designed category-based browsing and intuitive workflows to improve usability and accessibility.

ACHIEVEMENTS

- **Finalist** – Ashwamedha Case Competition, Indian Institute of Management (IIM) Indore
- **Finalist** – B2C Marketing Case Competition, Indian Institute of Management (IIM) Indore
- **3rd Place** – Futurepreneurs Business Simulation Competition, Entrepreneurship Cell, VIT

EXTRACURRICULAR ACTIVITIES

Stellar – Astronomy Club, VIT

March 2024 – Present

Senior Core Member

Vellore Institute of Technology, Vellore

- Coordinated technical events, outreach initiatives, and workshops for one of VIT's largest student communities.
- Helped organize flagship events including Aerovate 2.0, Celestial Dive 4.0, Cosmic Walk 3.0, & Celestial Combat.
- Mentored junior club members while collaborating with cross-functional teams to plan and execute club activities.
- Contributed to marketing campaigns, sponsorship initiatives, content strategy, and merchandise design for enhancement.
